Invitation to SSAI 2022 in Oslo!

Register today, early bird prices until April 30<sup>th</sup> 23:59!

**Dear Colleague,**

The congress will take place **in Oslo from 8<sup>th</sup> - 10<sup>st</sup> June 2022** at the Clarion Hotel The Hub downtown Oslo within close walking distance from the Central Railway and Bus Station.

We expect the SSAI Congress in Oslo 2022 to be a long-awaited opportunity to physically meet, mingle and discuss our latest achievements within the international community of anesthesiologists and intensivists. Check [www.SSAI2022.com](http://www.SSAI2022.com) for more information. **The Web site is open for registration at early bird prizes until April 30<sup>th</sup> 23:59!**

Enclosed with this mail is the program. We have invited more than 130 lecturers, the majority is of course from the SSAI countries, but we also have speakers from UK, Canada, USA, Belgium, Netherland, Germany and Portugal. We are proud to present such a high-level competent faculty as many of the speakers are world renowned. We hope you find the program inspiring! We have covered all fields in our specialty, both clinically and scientifically, and have also covered themes like pollution caused by anesthesia drugs and gases, DEI (diversity, equity, inclusion), artificial intelligence and climate crisis: implications for medical treatment and much more. Study the program and make your choices between 6 parallel sessions.

There will be many opportunities for social gatherings: a welcome reception in the City hall on Wednesday, and on Thursday a conference dinner with excellent food and superb entertainment. In addition, you have all what Oslo offers during light summer evenings and nights.

Are you eager to meet all your colleagues that you have not seen in nearly three long years? Register today! [WWW.SSAI2022.COM](http://WWW.SSAI2022.COM)

We look very much forward to meeting you in Oslo.

Kind regards,  
Tor Inge Tønnessen  
Congress President of the 36<sup>th</sup> biennial SSAI conference

Professor of Anaesthesiology and Intensive Care Medicine
